

MUNICIPAL INTERMEDIATE DURATION

By applying our robust credit research and tactical management style within the universe of investment grade municipal bonds we aim to maximize the after-tax total return by capitalizing on the inefficiencies in the 1-15 year maturity range.

PORTFOLIO CHARACTERISTICS:

STRATEGY ASSETS	\$21MM
EFFECTIVE DURATION	4.02 Yrs
AVERAGE TIME TO MATURITY	5.81 Yrs
AVERAGE RATING (HIGHEST)	AA-

CURRENT YIELD	4.12%
YIELD TO MATURITY	1.48%
YIELD TO WORST	0.88%
AVERAGE COUPON	4.78%

	QTD	YTD	1 YEAR	3 YEAR	5 YEAR	7 YEAR	*SINCE INCEPTION
MUNI INTERMEDIATE DURATION COMPOSITE - GROSS	0.24%	0.92%	0.92%	4.12%	3.47%	2.92%	2.90%
BLOOMBERG BARCLAYS 1-10 YEAR MUNI BOND INDEX	0.18%	0.54%	0.54%	3.44%	3.09%	2.54%	2.57%
MUNI INTERMEDIATE DURATION COMPOSITE - NET	0.17%	0.62%	0.62%	3.79%	3.14%	2.60%	2.57%

*Inception Date 03/31/12

Returns less than one year are not annualized. Net of fee performance is net of actual fee. Past performance is not a guarantee of future performance.

MUNICIPAL INTERMEDIATE DURATION

GIPS REPORT | DECEMBER 2020

For the Period Ending	Gross of Fees (%)	Net of Fees (%)	Barc 1-10 Yr Muni Index (%)	Number of Accounts	Composite	Barc 1-10 Yr Muni Index	Composite Dispersion (%)	Composite Assets (Millions)	Total Firm Assets (Millions)
					3 Yr Std Dev (%)	3 Yr Std Dev (%)			
2020	5.60	5.26	4.23	6	2.80	2.76	0.50	17	1048
2019	5.91	5.56	5.63	8	1.81	1.88	0.71	22	748

*March 31, 2012 thru December 31, 2012

Clinton Investment Management, LLC (CIM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. CIM has been independently verified for the periods May 31, 2007 through December 31, 2020. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis.

Notes:

- CIM is an independent registered investment adviser. CIM was established in 2007 and primarily manages fixed income products for high-net-worth, ultra-high-net worth, and institutional clients.
- The Intermediate composite includes portfolios that invest in municipal bonds. The objective of the composite is to track and/or outperform the benchmark in any given cycle. This strategy is to enhance portfolio income/total returns that are similar to or higher than that of its benchmark, the Bloomberg Barclays Municipal 1-10 Year index. Other major statistical factors are considered when constructing portfolios but may not be primary constraints such as duration position, sector allocation, credit quality selection and bond structure. Leverage and derivatives are not used.
- The composite consists of fully discretionary, fee paying accounts under management, including terminated accounts for the period they were fee paying accounts. The composite's creation and inception date is *March 31, 2012.
- The US dollar is the currency used to express performance.
- The benchmark for the composite is the Bloomberg Barclays Municipal 1-10 Year Index which is a broad-based, total-return index comprised of approximately 30,941 investment grade issuers of fixed-rate securities with maturities between one and ten years. Please note an investor cannot invest directly in an index.
- Gross-of-fees performance returns represent returns prior to the deduction of management fees but after all trading expenses. Net-of-fees performance returns are calculated by deducting the actual investment management fee from the gross returns. Accounts may be charged additional advisory fees on top of CIM's investment management fee.
- The performance numbers include the reinvestment of income and capital gains.
- Internal dispersion is calculated when five or more portfolios were in the composite for the entire year using the Gross asset-weighted standard deviation of those portfolios that were included in the composite for an entire year. The 3-Year Standard Deviation represents the annualized standard deviation of actual Gross composite and benchmark returns, using the rolling 36-months ended each year-end.
- Past performance is not indicative of future returns. Actual results may differ from the composite results depending upon the size of the account, investment objectives, guidelines and restrictions, inception of the account and other factors.
- The fee schedule is: 0.60%. Investment advisory fees are negotiable based on account size, investment strategy and relationship type and may differ between accounts.
- Policies for valuing portfolios, calculating performance, and preparing GIPS Reports and a list of composite descriptions are available upon request.
