

MUNICIPAL CREDIT OPPORTUNITIES

By applying our robust research and tactical management style within a universe of lower rated municipal bonds we aim to provide a high level of sustainable current income. Historically municipal bonds in the BB-A ratings categories have experienced a significantly lower default rate than taxable bonds of similar credit quality. This strategy looks to maximize cash flows by repositioning portfolios when credit opportunities arise.

PORTFOLIO CHARACTERISTICS:

STRATEGY ASSETS	\$575MM	CURRENT YIELD	3.84%
EFFECTIVE DURATION	6.12 Yrs	YIELD TO MATURITY	2.86%
AVERAGE TIME TO MATURITY	16.12 Yrs	YIELD TO WORST	1.62%
AVERAGE RATING (LOWEST)	A-	AVERAGE COUPON	4.49%

	QTD	YTD	1 YEAR	3 YEAR	5 YEAR	7 YEAR	*SINCE INCEPTION
MUNI CREDIT OPPORTUNITY COMPOSITE - GROSS	1.11%	3.97%	3.97%	7.09%	6.05%	5.30%	5.37%

Clinton Investment Management, LLC (CIM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. CIM has been independently verified for the periods May 31, 2007 through December 31, 2020. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Notes:

1. CIM is an independent registered investment adviser. CIM was established in 2007 and primarily manages fixed income products for high-net-worth, ultra-high-net worth, and institutional clients.

2. The Municipal Credit Opportunities composite includes portfolios that invest in municipal bonds. The objective of the composite is to track and/or outperform the benchmark in any given cycle. This strategy seeks to enhance portfolio income and deliver total returns that are similar to or higher than that of its benchmark, the Bloomberg Barclays Municipal 65% HG/35% HY Index, through investment in lower to below investment grade securities. Other major statistical factors are considered when constructing portfolios but may not be primary constraints such as duration position, sector allocation, and credit quality selection. Leverage and derivatives are not used.

3. The composite consists of fully discretionary, fee paying accounts under management, including terminated accounts for the period they were fee paying accounts. The composite's creation and inception date is *September 30, 2014.

4. The US dollar is the currency used to express performance.

5. The benchmark for the composite is the Bloomberg Barclays Municipal 65%HG/35%HY Index which measures the performance of the blended US high grade (65%) and high yield (35%) municipal bond universe. It includes approximately 53,638 municipal issuers. It is constructed to provide a comprehensive and unbiased blended municipal bond market barometer. Please note an investor cannot invest directly in an index.

6. Gross-of-fees performance returns represent returns prior to the deduction of management fees but after all trading expenses. Net-of-CIM-fees performance returns are calculated by deducting the actual CIM investment management fee from the gross returns. Net of CIM Fee is considered GIPS supplement information, since some accounts may incur additional wrap fees for investment management and custodial fees, which are not included in CIM net performance.

7. The performance numbers include the reinvestment of income and capital gains.

8. Internal dispersion is calculated when five or more portfolios were in the composite for the entire year using the Gross asset-weighted standard deviation of those portfolios that were included in the composite for an entire year. The 3-Year Standard Deviation represents the annualized standard deviation of actual Gross composite and benchmark returns, using the rolling 36-months ended each year-end.

9. Past performance is not indicative of future returns. Actual results may differ from the composite results depending upon the size of the account, investment objectives, guidelines and restrictions, inception of the account and other factors.

10. The fee schedule is: 0.85%. Investment advisory fees are negotiable based on account size, investment strategy and relationship type and may differ between accounts.

11. Policies for valuing portfolios, calculating performance, and preparing GIPS Reports and a list of composite descriptions are available upon request.

12. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.
