- Credit Opportunities
- Short Duration
- Taxable Market Duration
- Market Duration
- Intermediate Duration

We Focus On

Duration

We position portfolios based on our view of the future direction of interest rates, taking advantage of inefficiencies along the municipal yield curve.

Sector Allocation

We aim to further enhance client returns through sector allocations, viewing each state as its own municipal sector in addition to generic municipal sectors.

Security Selection

Through deep research and quantitative analysis, we seek to uncover and exploit any structural mispricing that exist in individual securities.
